

FNI Case Study

School of Environmental Studies

Apple Valley, Minnesota

Organization:

The School of Environmental Studies (SES) includes four "houses" of 100 students each. Each house has a common area for interdisciplinary, project-based, and collaborative learning. Each House opens to a Science Lab, Advisor (Teacher) Work Area, and a classroom for direct instruction.

SES is a public school of choice open to 11th and 12th graders throughout the district. Each student has their own workstation with built-in personal storage and is part of a cluster or "Family" of ten students.
